Sustainability Commitment for PATA events

PATA is committed to hosting carbon neutral events. We believe that it is our responsibility to minimise our impact on the environment and to create a more sustainable future.

Join us in delivering sustainable and responsible events.

Carbon Reduction Strategy

Every PATA event is benchmarked with the carbon footprint of flights, local transportation, accommodation and meeting venues. The calculations follow international best practices developed and supported by our PATA members.

Onsite Green Events Initiatives

At our events, we take carbon reduction seriously. From selecting high-efficient venues, ensuring waste is recycled, and reducing single-use plastics, we strive to minimise our carbon footprint.

Available shared transportation and public transport

Air-con temperature in meeting rooms set around 25 deg C

Meeting rooms that offer natural daylight

Serving locally-sourced food

Offsetting

We understand that it is not always possible to reduce carbon emissions to zero. That is why we also opt for carbon offsets. They help to balance out the remaining emissions through projects that reduce or remove carbon dioxide from the atmosphere. By investing in these projects, we are able to make a tangible positive impact.

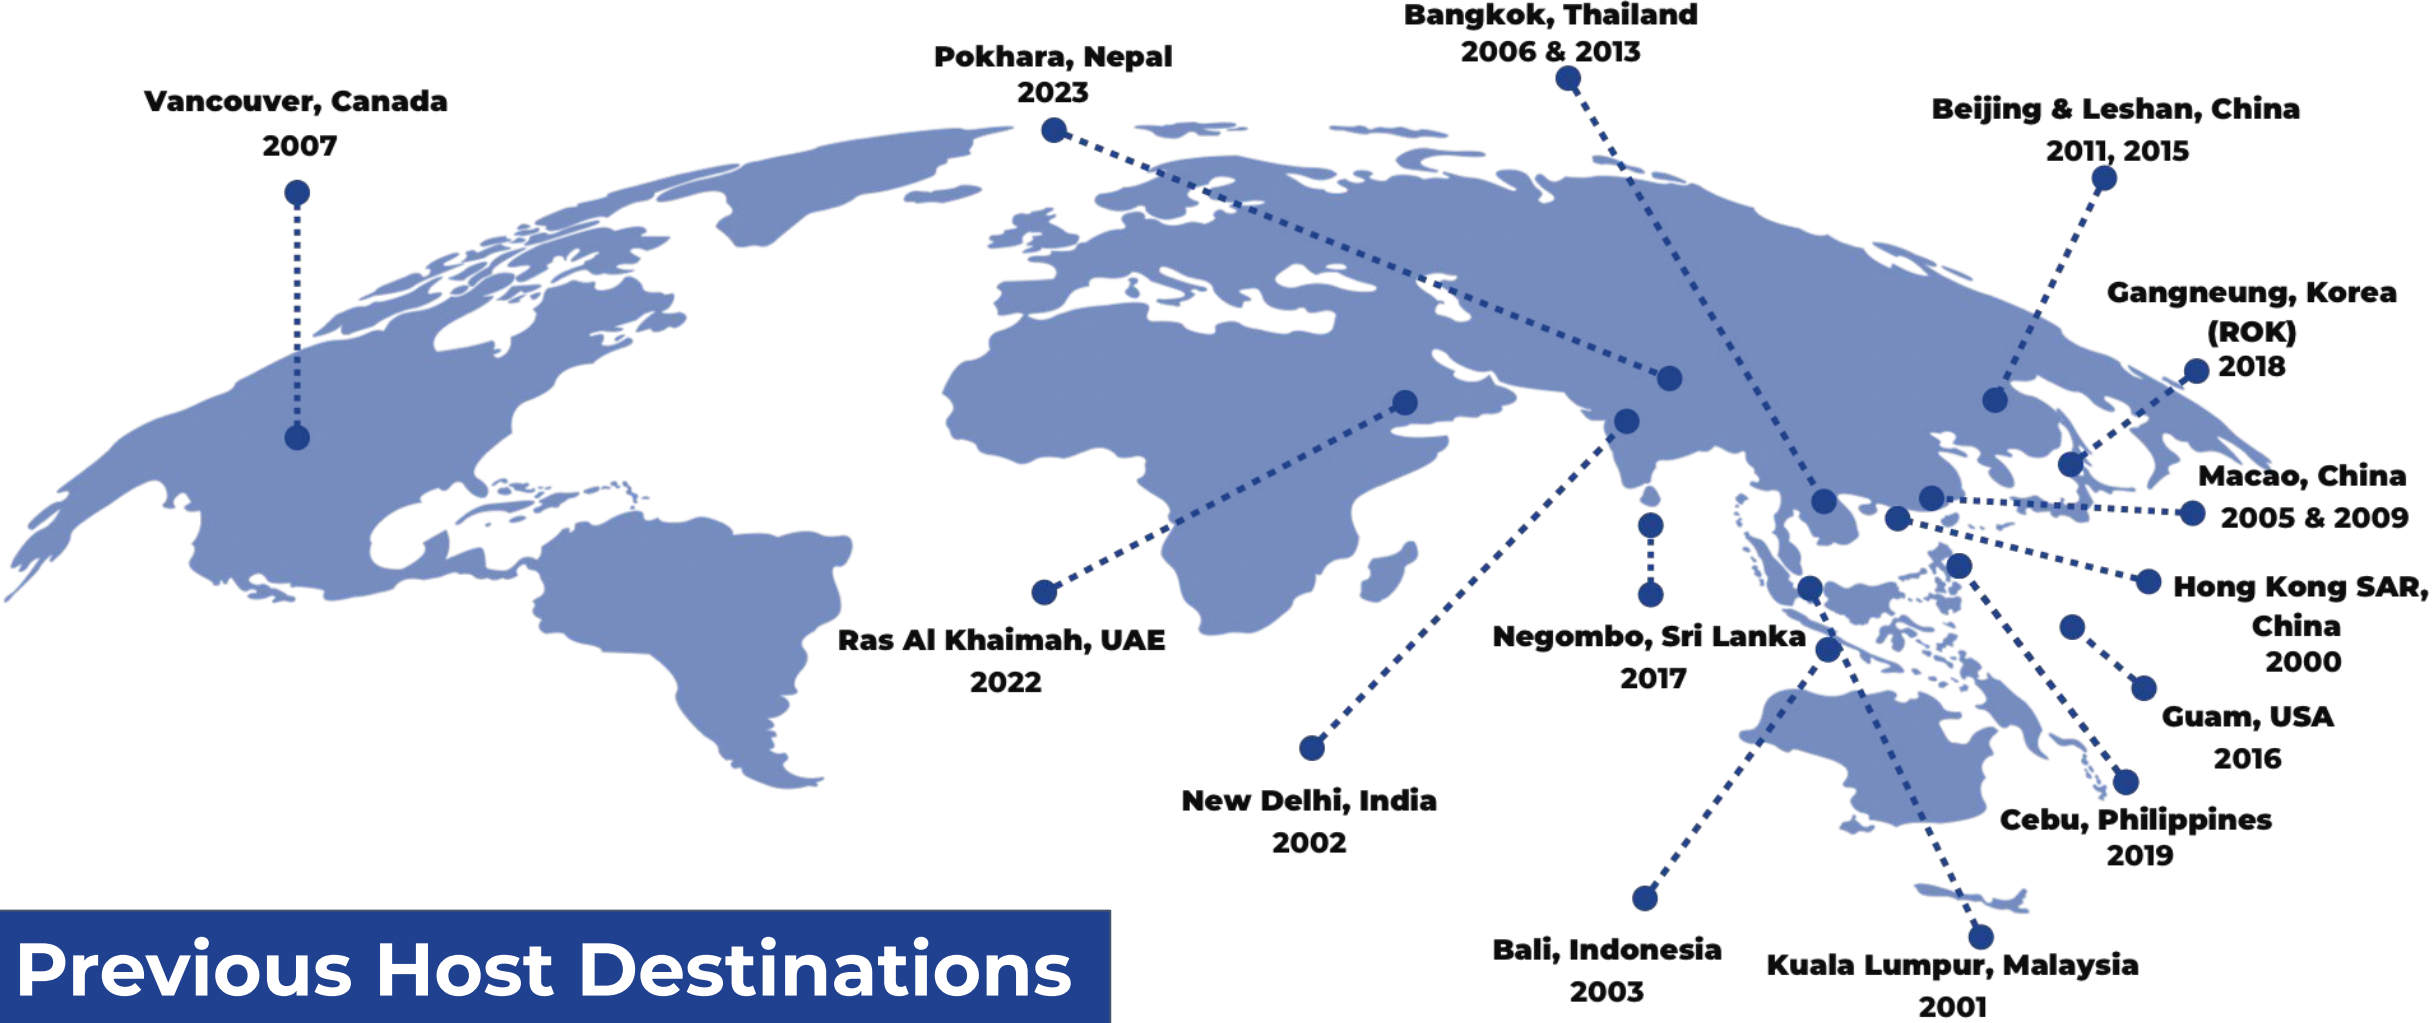

Concept

PATA ANNUAL SUMMIT 2024

The PATA Annual Summit 2024, generously hosted by the Macao Government Tourism Office and supported by SJM Resorts, S.A., embraces a global tourism forum that brings together international thought leaders, industry shapers and senior decision-makers who are professionally engaged in driving tourism to, from, and within the Asia Pacific region.

The extensive programme, comprised of plenary sessions, breakout sessions, the PATA Executive Board and Board meetings, and Annual General Meeting, will provide a platform for PATA's public and private sector members and partners, and most importantly PATA Chapters and PATA Youth from around the world to discuss the challenges, issues and opportunities facing the industry as it looks towards the responsible and sustainable growth, value, and quality of tourism in the region.
